Profile Summary

Java Full Stack Developer with 3 years 5 months of experience building enterprise retail finance, billing, and inventory/stock management systems using **Java, Spring Boot microservices, RESTful APIs, Angular, and MySQL/MSSQL**. Delivered accounting modules with **Tally and SAP integration**, **HDFC payment gateway integration** with dynamic PDF generation, a ticket workflow platform, and a **.NET-to-Java migration**. Hands-on with **Spring Security/JWT** (authentication and authorization), **JPA/Hibernate**, and OTP-based authentication.

Technical Skills

Backend	Java, Spring Boot, Spring MVC, Spring Framework, Spring Security, JWT, Microservices Architecture, RESTful API Design & Integration, JPA / Hibernate
Frontend	Angular, TypeScript, HTML5, CSS3, Angular Material, Responsive UI Design
Databases	MySQL, MSSQL, Query Optimization
Domain / Integration	Retail Finance & Accounting, Billing, Inventory/Stock Management, Payment Gateway Integration (HDFC), Tally, SAP, Dynamic PDF Generation
Tools	Maven, Eclipse, Spring Tool Suite 4, VS Code, Tomcat, Postman, MySQL Workbench, SSMS, SQL Developer
Version Control	Git, SVN
Platforms	Windows, Linux (Ubuntu)

Experience

JRK Consulting Services Pvt Ltd **Tamil Nadu, India**
Java Full Stack Developer *May 2023 – Sep 2026*

- Built and maintained Java/Spring Boot backend services and Angular frontends for enterprise finance, billing, and workflow applications, owning features from database design through UI delivery.
- Developed secured RESTful APIs with **authentication and authorization** using **Spring Security and JWT**, with data access built on **JPA/Hibernate** over MySQL and MSSQL.

Enterprise Retail Financial Management System *Java / Spring Boot / Microservices / Angular / MySQL*

- Developed a full-stack financial management system for retail operations using **Java, Spring Boot, Angular, and MySQL**, built on a **microservices architecture**.
- Designed independent microservices for Trial Balance, Vendor Purchase, Book Stock (**inventory/stock management**), and Expense Management, communicating through **REST APIs**.
- Integrated **Tally and SAP** for financial reconciliation and reporting.
- Increased accounting accuracy by 30% and reduced manual errors by 40% through automated workflows and validation processes, saving approximately 60 hours per month.

Secure Payment & Billing Platform (WebScheme Product) *Spring Boot / Angular*

- Enhanced a web-based billing and payment system using **Angular and Spring Boot**.
- Completed **HDFC payment gateway integration** for secure online transaction processing.
- Implemented dynamic PDF generation and customized client-specific payment workflows.
- Redesigned 15+ UI components using Angular Material, contributing to a reported 35% increase in customer engagement.

Ticket Management System *Java / Spring Boot / Workflow Automation*

- Built a Java/Spring Boot service to manage defects, enhancements, and support tickets across the SDLC.
- Automated the ticket lifecycle (creation, assignment, development, QA validation, delivery) with role-based status updates and real-time progress tracking.
- Improved visibility across teams and streamlined development-to-QA handoffs for faster issue resolution.

Legacy Application Modernization (.NET to Java Migration) *Java / MSSQL / JPA*

- Migrated legacy desktop modules from **.NET to Java**, improving maintainability and scalability.
- Re-engineered business logic and implemented OTP-based authentication.
- Optimized database interactions using MSSQL and JPA, improving application response times by approximately 25%.
- Maintained backward compatibility during the transition, with 99.9% system uptime.

Education

B.E. Mechanical Engineering — Einstein College of Engineering, CGPA **8.20/10** **2019 – 2023**
Higher Secondary (HSC) — S.S.V Higher Secondary School, **76%** **2018 – 2019**
Secondary (SSLC) — Govt High School, **92%** **2016 – 2017**
